

Role: CNC Miller (Night Shift)
Location: Benton, North Tyneside
Salary: Competitive hourly rate, with overtime opportunities

ABS Precision is seeking **two skilled CNC Millers** to join its dynamic team on a **night shift pattern**. This is an excellent opportunity to work in a fast-paced, precision-focused environment with competitive pay and additional overtime options.

Key Responsibilities:

- Set up, program and operate CNC milling machines to produce high-quality components.
- Interpret technical drawings and specifications with precision.
- Conduct quality checks to ensure compliance with engineering standards.
- Maintain a clean and organised workspace.

Candidate Requirements:

- Proven experience as a CNC Miller in a manufacturing environment.
- Experience using HURCO and HAAS machines is advantageous, but training will be given.
- Ability to work independently and as part of a team.
- Strong attention to detail and commitment to quality.
- Flexibility to work day shifts.

Company Benefits:

- Competitive hourly rate.
- Overtime opportunities.
- Supportive and collaborative team environment.
- Company pension scheme.
- Corporate rates at local council leisure facilities.
- 25 days holiday, plus bank holidays.

Why Work With ABS Precision:

The company's expertise in precision manufacturing for critical applications has made it a trusted supplier in sectors where reliability is non-negotiable – and the company has been working with industry leaders since the company was founded in 2004.

ABS Precision provides solutions that withstand extreme environments, high pressures and demanding operating conditions, and can deliver at high volumes to industries including subsea, oil and gas, renewables, nuclear and defence.

As well as being committed to serving industry, the company is also committed to serving its local community. As a British company with decades of engineering heritage, ABS Precision is proud to be developing the next generation of engineers and to be providing opportunities for young people in our region through our apprenticeship programme.
